## INTRODUCTION

---

Cubiform Restrooms offer a washroom experience for high quality commercial applications. Beautifully simple in its modular design, the Cubiform Restroom is unsurpassed in both quality and integrity.

Fully integrated system components include concealed hardware, total privacy flush face doors and pilasters, and integration with the Cubiform IPS Wall Lining System. With a wide range of colors, textures and finishes available, Cubiform Restrooms offer a range of natural and durable materials, delivering both visually stunning and high performance solutions without compromise.

The end result is a modular solution that is tailored to your unique aesthetic requirements. Wherever there is a need for washroom solutions, be it wood, HPL, CompactWood® or Phenolic, Cubiform Restrooms are the smart solution.

## INLINE CONFIGURATION

---

FLUSH FACED DOORS & PILASTERS MAKE FOR A  
CLEAN, MONOLITHIC FINISH

## OFFSET CONFIGURATION

---

OFFSET DOORS & PILASTERS ARE QUICK TO  
INSTALL

## TYPICAL PANEL ARRANGEMENT

---

Doors, Pilasters and Divider panels are standard 72" height (available up to 120" high). The doors and pilasters are precision machined so as to eliminate sight lines. Inline configuration provides doors and pilaster faces flush with one another. Offset configuration provides in-swing doors mounted to the back face of pilasters and out swing doors mounted to the front face of pilasters. The pedestal support provides adjustable ground clearance and keeps contact with the floor to the absolute minimum. This combination provides the most private, secure and clean restroom compartments available.

## DOOR PULL

---

The door pull is supplied as a pack of two stainless steel door pulls. For outswing doors only

## INDICATOR LOCK & KEEP

---

The Stainless Steel Door Lock contains a rotary indicator latch, which is operated by a rotating handle, that in the horizontal position locks the cubicle.

The Stainless Steel Indicator Latch Assembly is equipped with a red and white Occupied / Unoccupied indicator, and with an external emergency release feature.

All necessary hardware and mounting screws are included.

## DOOR HINGE

---

The door hinge is supplied as a pack of 2 stainless steel hinges. The pack contains one floating hinge and one rise and fall hinge. The hinge packs are handed to suit the door hanging and 1 hinge is pre-set closed, but fully adjustable to a 15 degree opening angle (Top Hinge).

The hinges are fixed using the hinge screws (Hardware Provided).

## HEAD RAIL

---

The Cubicle D Head Rail is supplied in 118" lengths of anodized aluminum. This is fixed to the top of all pilaster's using Multi Purpose Screws supplied by installer. Ensure that the cut end of the headrail is positioned at the pilasters edge of the cubicle module or flush against existing walls.

## PEDESTAL

---

The Pedestals attach to pilasters or dividers with a Connector Bolt, which is included.

Hardware supplied for floor mounting included but may not be applicable to all floor types.

Note: Standard pedestals from 4 7/8" to a 6" max pedestal height. Options available from 2" to 12".

## U-BRACKET

---

The Stainless Steel U - Bracket is used to fix the cubicle dividers pilasters to each other and existing walls.

Fixings incorporated include Tamper Proof Through Bolt for pilaster and divider and 3 Multi Purpose Screws, when fixing to an existing wall.

Hardware supplied for floor mounting included but may not be applicable to all floor types.
